

Did you know diabetes can cause many complications, including heart damage?

If you have type 2 diabetes, consider joining the ARISE-HF study to learn about a possible therapy for preventing heart damage caused by diabetes.

Key study entry requirements:

- Type 2 diabetes
- At least 40 years old

Note: Other requirements apply

Study participants will receive at no cost:

- Potential access to an investigational study drug. An investigational drug can only be used for research and cannot be sold publicly
 - Note: Some participants will receive a placebo (sugar pill)
- Study-related support and monitoring by a healthcare team
- Education about diabetic complications, including heart damage
