Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
29	30	31	1	2	3	4
5	6	7	8	9	10	11
12	13	14	15	16	17	18
19	20	21	22	23	24	25
26	27	28	29	30	1	2

An insulin routine doesn't have to subtract from your daily life. Weekly basal insulin could one day replace daily basal insulin, and your participation in clinical research may help us get there.

If you're looking for a different way to manage your diabetes, see if the **QWINT-2 Study** is right for you.

The **QWINT-2 Study** is evaluating an investigational long-acting insulin for adults with type 2 diabetes.

You may be able to participate if you:

- Are at least 18 years old
- Have been diagnosed with type 2 diabetes
- Have taken 1–3 antidiabetic medications for the past 3 months
- Have not been prescribed insulin before (except for gestational diabetes or short-term treatment)

Qualified participants will receive all study-related care at no cost.

Contact us today to see if you qualify:
